## SAFES

***Secure your valuables  
with the Best***

# Series 4000 Safes

1700°F for 1 Hour Fire Rating

## DOUBLE-BODY CONSTRUCTION

Securall Firearm Safes are manufactured utilizing two separate interlocking bodies. While the inner wall on many so called double-wall safes is nothing more than a tacked in liner panel to help hold the insulation in place, a SECURALL Safe's inner body is designed and constructed as a second safe. With a separate continuously welded steel inner body, a SECURALL Safe provides you with twice the protection of ordinary safes.

## DRYSTONE CAST INSULATION

In addition to the standard rigid fire insulation used by most safe manufacturers, SECURALL incorporate a poured and hardened Drystone insulation barrier between all sections of its outer and inner safe bodies. This procedure provides extra fire protection for your valuables and is the primary reason for SECURALL's superior 1700°/1 hour fire rating.

## ELECTRONIC LOCK

A Group 1, state of the art, electronic combination lock is standard equipment on all SECURALL Safes. Unlike a conventional tumbler lock with a spindle that can be driven through the door to dislodge the lock, these manipulation proof locks provide maximum security with digital keypad convenience & speed.

### STANDARD

*Group 1 Rated Manipulation Proof Electronic Combination Lock.*

This high security LaGard digital lock has a fully programmable smooth touch keypad

allowing you quick access to your SECURALL Safe.

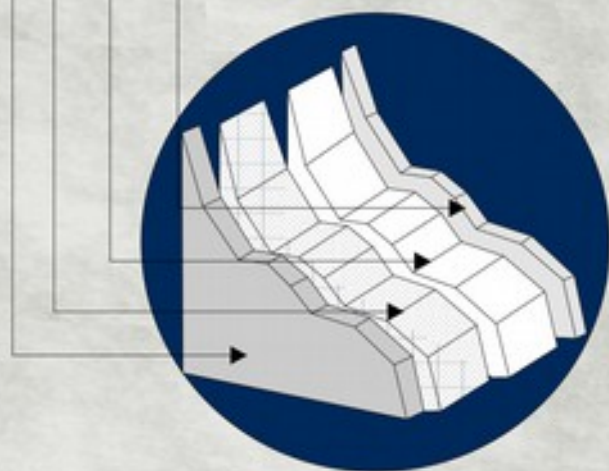

## BODY CONSTRUCTION

Inner body 3/16" structural steel plate

Drystone cast insulation

Fire rated insulated panel

Outer body 12ga steel

## DOOR CONSTRUCTION

Inside door panel

3/16" steel plate liner

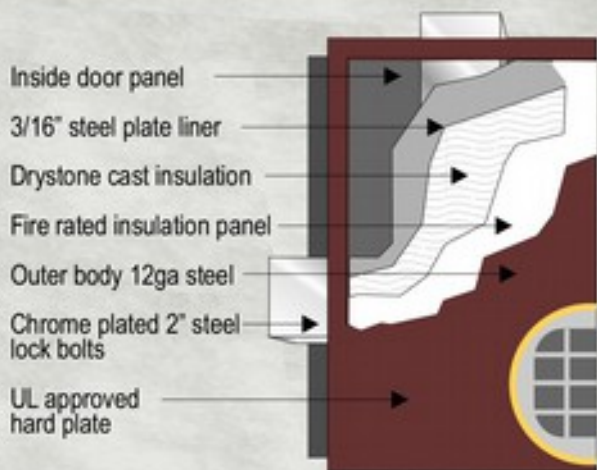

Drystone cast insulation

Fire rated insulation panel

Outer body 12ga steel

Chrome plated 2" steel lock bolts

UL approved hard plate

## ELECTRONIC LOCK

### OPTIONAL

*Group 2 Rated Electronic Combination Lock.*

At no additional charge you can specify Sargent & Greenleaf's key pad operated lock.

*Both locks shut down for 15 minutes if four incorrect codes are entered in a row.*

When it comes to protecting your valuables and firearms

from fire you want the best. That is why SECURALL had its safes tested and listed by an independent laboratory.

After rigorous fire exposure testing by Omega Point Laboratories, we are pleased to report that our Series 4000 safes achieved a 1700°F/1 hour fire rating. Few gun safes in the marketplace today boast comparable fire ratings.

Furthermore, pursuant to an ongoing listing agreement with Omega Point Laboratories, SECURALL's production and quality standards are being regularly monitored by Omega Point representatives. This provides the consumer with the added assurance that each Series 4000 safe coming off the SECURALL production line is manufactured to the same quality standards as those safes that were originally tested.

## High Security Cabinets

When you have a need for additional firearm security, these cabinets will accommodate and protect your weapons from unauthorized use, fire and theft. Cabinets are constructed of heavy 18 gauge steel with 1 1/2" air space throughout, double wall construction, and aesthetically pleasing radial corner edging. Two-door design provides for safe and easy access by eliminating the problem of obstructed aisles, cabinet instability and tipping associated with large single door units. All models equipped with a Group I Rated manipulation-proof LaGard Electronic Combination Lock. Its fully programmable smooth touch keypad and Brass Plated "Lever" handle allow you quick access to your valuables. Shelves are 18-gauge galvanized steel and lined with fire retardant carpeting.

Painted in High Gloss Metallic polyurethane and available in Charcoal Gray, Black, Forest Green and Burgundy. Custom colors available.

### Fire Insulation Upgrades

**Fire Protection Package (FI)** - Upgrade your High Security or Gun Cabinet with a Fire Insulation Package. Sidewalls, back, doors and roof are lined with 3/4" Gypsum Panel Drywall between interior and exterior panels, creating a fire protection barrier. Factory Installed. Approx. additional Ship wt. 150 lbs.
